

May 29, 2015

To: members, participants, inhabitants of planet earth and/or inter-dimensional or intergalactic beings concerned with our collective fate.

RE: Royal Dutch Shell and Arctic Drilling operations currently in preparation in the Port of Seattle, occupied Duwamish and Suquamish lands (AKA The Emerald City and the Land of Oz)

YOU are invited to a collaboration of grand scale to help save the past, present and futures from a most terrible fate.

As of NOW one doombringer, the "Polar Pioneer", is already stationed in the Port of Seattle. Another doombringer, the "Noble Discoverer", is stationed in the Port of Everett and plans to join its demonic brethren in the Port of Seattle soon, where the Doomfleet is being prepared for its mission to drill for oil in the Arctic. The demon's spell of Empire has trapped many of our relatives and put them to work in preparing the Doomfleet, despite the immediate threat it represents to all life.

Overseers, enforcers and scabs from the Port of Seattle Commission, Royal Dutch Shell, TransOcean, Foss Maritime, Noble Corporation, Oil Pro, Rigzone, the Seattle Police Department, the Valley Civil Disturbance Unit, the Obama Administration and the US Government, US Coast Guard, US Military, Incident Catering Services, Carlile Transportation, Jones Stevedoring, the Inland Boatmen's Union of the Pacific, and the International Longshore and Warehouse Union (ILWU Locals 7, 19, 32, 52 and 98) are currently collaborating in the **6th mass extinction on Earth**. This is no exaggeration. This extinction is characterized by the rich using fossil fuels to overheat the earth and to construct enclaves with micro-controlled climates where they thrive while the rest of us unnecessarily suffer and die outside of their walls.

The story with which Empire and energy companies have colonized our imaginations and present realities is leading us down a path of ultimate self-destruction. We need to gather together as fast as we can. We must share our stories. We must remember all that came before us.

We must collectively sculpt our destinies. Staring certain death in the face as a consequence of our willing or unwilling incarceration in this oily war machine, all we are left with is each other and our ability to weave together a world in which many worlds fit.

Our resistance to the threat against our existence creates a portal from the futures, where battle is done over what fate we meet. There are many ways to engage in this struggle. Create other communiqués convoking communities to congregate and collaborate against our doom. For those who can arrive to Occupied Duwamish and Suquamish lands before the Doomfleet's scheduled departure (currently June 10, 2015 but subject to change and they will miss the drilling season if delayed past the 30th), there are already ample accomplices awaiting your arrival. The rumors are true! Autonomous action camps grounded in sharing of food and stories in the midst of resistance to the Doomfleet are sprouting victories against the Empire. Those who cannot physically participate with the camps nearest to the Doomfleet can engage this particular portal from the futures by attacking the hydra head of Shell nearest you and sharing stories. In a myriad of mediums—**our lives, bodies and physical rebellions**, writing, speaking, video, hip hop, poetry, spoken word and music of all sorts—generate and share stories of our successes and failures against the Doomfleet and Empire. From the perspective of grandchildren to come, how was the war on life brought to an end? How did you act in response to this information? What are the consequences for them of the actions you took and the actions you did not take? **What will the world look like in 3 weeks, 3 months, 3 years, 300 years, 3,000 years if we do not stop the Doomfleet? If we do?**

A quest has been delivered to all who seek life: Royal Dutch Shell's arctic drilling fleet must not leave the Port of Seattle.

Get (y)ourself free.
